Acoustics and Psychoacoustics gives you an essential grounding and understanding to how real music sounds behave in different spaces whether during a performance or a recording and how they are perceived by performers and listeners. An understanding of psychoacoustics and cognitive psychology is essential to anyone wishing to pursue a career in acoustics, recording, audio arts, sound contracting, sound reinforcement, multimedia authoring, music, or any other field that involves sound.

Acoustics and Psychoacoustics is ideal for students of music technology, sound recording, traditional music and acoustics, as well as engineers studying audio, multimedia and communications systems.
