It is not easy to say what metaphysics is. Ancient and Medieval philosophers might have said that metaphysics was, like chemistry or astrology, to be defined by its subject-matter: metaphysics was the “science” that studied “being as such” or “the first causes of things” or “things that do not change”. In Western philosophy, metaphysics has become the study of the fundamental nature of all reality — what is it, why is it, and how are we can understand it. Some treat metaphysics as the study of “higher” reality or the “invisible” nature behind everything, but instead, it's the study of all of reality, visible and invisible.
