Science fiction/ fantasy has gotten another tweak in a world mixed with humans and other races. Nolan is a typical nerd in a world where things like that don't matter- a world where you are separated by powers and bright colors. It makes it easy for him to hide/5. The author tried to cram a little too much in the first book and the story was a light on explanation when it came to Brim and the stones. The creatures in the woods were easy to identify early on and this is not the first time I have encountered that story line in a fantasy novel.
